The World's Best Trees and Plants for Your Garden

A Delicious Apple Tree for Every Home

Don't fail to set one of these beautiful Apple trees somewhere around your home this spring. For the Delicious grows everywhere and requires little care and attention. Its crisp tender flesh, rich and juicy; the tang of its flavor like old wine; its heavy annual yield of red beauties makes it the great

Home Apple of the Nation

We have a limited supply of specimen trees, grown for those of our customers who have room for only a few, and want results and want them quick. Each is heavily rooted, with beautiful symmetrical tops. Truly the world's best apple for your garden.

Special 3-year trees, \$1.25 each; \$12.00 per doz.

DWARF APPLES

An Everbearing Apple Tree?

No, but a Collection of Dwarf Apples That Serves the Same Purpose

A Dwarf Apple Tree the Second Year

Do you wish for 100% efficiency in your garden? The Year Round Dwarf Apple Collection answers your wish. It is the city man's best bet, for it can be planted in a space 12 x 12 this spring and next year you pick apples. Don't hesitate. Order today.

Follow Little Jack Horner's Example and Smile When You Pull RICH, LUSCIOUS, PEARS AND PLUMS

From Your Own Large Bearing Age Trees

If you want fresh, juicy fruit and want it now, and in sufficient quantity to give it a place on the family bill of fare, plant some of these magnificent Bearing Age Fruit Trees which we are offering for the first time this season; trees which are really a horticultural achievement.

Each tree has been grown, cultivated and pruned for a specimen. All of the trees run from **seven to nine** feet in height; symmetrically branched, heavily rooted—trees that are of bearing age and save you years of waiting for pears of rich flavor and delicious, juicy plums.

The pictures at the side show a pear and a plum tree dug at random from our block of specimens.

If You Want Big Fruit Trees for Immediate Results, Order Today

The Cherry Made the Pie Famous Give Your Palate a New Sensation With LAMBERTS

You remember of course, the big, fat, rich Cherries you climbed the tree for when a boy. Why deprive your children or yourself of the same pleasure today?

The Lambert is a beautiful purple Cherry, early in bearing, usually the second year, vigorous, hardy and productive. It is also one of the largest of Cherries. We recommend it without hesitation as a source of satisfaction to all and it deserves a place on your home grounds.

Special size beautiful three-year-old trees, well rooted and branched,
\$1.25 each; \$12.00 per doz.

Rich Purple Lamberts

Quince Jelly — Baked Quinces

On account of its dwarf habit the Quince requires only a small space in your yard; best of all it comes into bearing at once. It can be grown in bush or tree form and will give excellent results in any sort of good soil. Everyone should have at least one or two of these handsome trees in their yard.

We offer some fine, strong trees of the Orange variety, which is the best and most popular. The name is given it in an attempt to do justice to its delicious flavor.

Bearing age trees, \$1.00 each; \$5.00 per 6

Blowers Big Blackberries

Biggest and Best Money-Maker of All Blackberries

RECORD—14 ft. and 1 in. extreme height of bush. 2694 berries on one bush. 2720 quarts from one-third acre.

ON SEVEN ACRES—30,206 quarts; 45,307 lbs.; 943 15/16 bushels; 22 2/3 tons.

\$2,121.75 NET F. O. B. HERE—\$303.10 average per acre. 153 bushels netted \$344.25 from best acre.

The Quality—Its sprightly, yet moderate acid taste, is indicative of the presence of those valuable medicinal properties without which the blackberry is worthless. A large, clean, bright berry. The fruit is exceedingly sweet, with no perceptible core, when fully developed. It is a first-class shipper, standing up well for several days.

Hardiness—Plant Blowers Blackberries anywhere you would grow Concord grapes.

Distance Apart to Plant—Rows 8 ft. apart, 3 ft. in rows. This takes about 1800 plants to the acre.

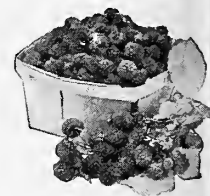

Season of Fruiting—The season of ripening is from July 25 until frost; the bulk of the crop matures in the month of August. The yield in September and October depends upon the season; very few in October. We have had blossoms and ripe fruit in November.

Extra fine plants, \$1.50 per doz.; \$10.00 per 100

"The Dessert Berry of the Nation"

The Erskine Park Everbearing Red Raspberry

The Erskine Park Everbearing Red Raspberry is a seedling from the old reliable Cuthbert, discovered on the Westinghouse Estate (Erskine Park) at Lee, Mass., by Mr. Edward Norman.

This magnificent estate is in the midst of the beautiful Berkshire Hills, with a temperature in winter of 30 or 40 degrees below zero, so that the hardiness of this berry is unquestioned. The estate is surrounded by the summer homes of many wealthy people, and much to the surprise of his neighbor gardeners and not without a deal of personal satisfaction, Mr. Norman furnished large, luscious raspberries throughout the fall for various dinner parties.

These berries are commented on by all who have seen and tasted them as the most delicious and best raspberry they ever have eaten. Mr. Baker, of Hoosic Falls, N. Y., writes us as follows, regarding this remarkable berry:

"In the season of 1916, Mr. George M. Darrow, of the United States Department of Agriculture, was traveling from the Atlantic to the Pacific, visiting fruit growers to obtain information on berries for bulletins published by the Department of Agriculture. Mr. Darrow had visited this estate before, and was most favorably impressed that this berry was far ahead of the St. Regis and Ranere, and when it became known it would replace these varieties. The plant is by far the strongest growing raspberry I have ever seen. It branches like a tree, and it also has the largest and most roots of any variety with which I am acquainted. It is perfectly hardy and the berries are very large."

Of this berry we cannot say too much in praise, and we predict that once known, it will be standard for planting in every garden and considered a necessity.

The Ranere and St. Regis have been the standard up to the present time. In the Erskine Park we have a berry that far surpasses either of these; a raspberry that is a delight to eat, each berry being of largest size with its delicious melting flesh, full of rich creamy juice, highly flavored and sweet as honey.

Conceive the joy and satisfaction of having such berries on your table all through the autumn, the source of wonder to your neighbors, that you can pick the finest raspberries until the snow flies. On November the 20th we cut a large branch of the Erskine Park with blossoms, green berries and ripe fruit upon it.

We have not as yet been able to propagate any large quantity of this magnificent berry, but what we have are the finest **Bearing Two-Year-Old Plants**, heavily rooted and branched that will bring a full measure of pleasure and satisfaction to the planter.

Strong Field-Grown BEARING PLANTS, \$3 per 6; \$5 per 12; \$15 per 50.

EVERBEARING STRAWBERRIES

Berries large, perfectly formed, beautifully colored, deliciously flavored. Hardy in plant, in blossom, in fruit. Luscious berries on your table four months of the year.

There are no lingering doubts as to the practical value of this new race of Strawberries. Not a discordant note in the general praise of their valuable qualities.

A well-known authority on strawberry cultivation states: "You simply cannot keep them from fruiting from June until November unless you pick their blossoms. They are the most persistent plants in their fruiting habit I have ever known."

"Many crates of superb berries, shipped more than a thousand miles, arrived in good condition and brought high prices."

BEST FOR MARKET AND BEST FOR HOME because they afford good picking a week before early varieties of the old kinds. Crop of June compares favorably with the old kinds and does not exhaust the vitality of the plant. Hardy from Maine to California, from Hudson Bay to Florida.

A magical opportunity for **everyone everywhere**—a quart of luscious berries on the table four months in the year from a square rod (16½ feet square) is within the reach of almost everyone, even the city resident.

Strong, field-grown plant, \$1.00 per doz.; \$3.00 per 100; \$20.00 per 1,000

BLACK WALNUT

AS AN ORCHARD TREE it's a dividend payer; growing rapidly; giving returns at six or seven years of age; enduring severest cold, heat and drouth; having few if any enemies.

\$10,000 INCOME. It's said one thousand trees (twenty acres) will produce an income of \$10,000.

AS A ROAD SIDE TREE it's indispensable, thriving under the most adverse conditions, producing delicious Walnuts even on rough land, worthless for orchards.

AS A TIMBER TREE it's supreme; producing the most beautiful and the most costly of all hard woods; a tree is easily worth \$250.00 at thirty years of age.

AS A LAWN TREE it's an aristocrat; beautiful symmetrical form, magnificent proportions.

Mr. Thomas P. Littlepage, one of the foremost experts on nut culture in the country, often refers to the Black Walnut as "fool-proof." We think this is a most happy adjective to use for this superb specie, as of all the nut trees now cultivated in this country, the American Black Walnut is the one which should be most universally planted.

A Black Walnut tree once planted will take care of itself. It needs no pruning or spraying. Furthermore the product is not perishable and can be kept and shipped when and where the prices are the highest. In twenty-five years your tree is easily worth \$200 to \$400 for timber alone. With the strong interest in the air-plane industry, and the great boom bound to follow the conclusion of the war, the planter of Black Walnuts will reap a fortune, for this wood is absolutely essential. For the practical side, a well-cared-for orchard of Black Walnuts at the age of ten years is estimated to give a gross return of \$200.00 and a net yield of fifty per cent. of this. From that time on the production increases by leaps and bounds.

6- 8 ft., \$.75 each; \$ 8.00 per doz.; \$60.00 per 100

Specimens 8-10 ft., 3.00 each; 30.00 per doz.

Stabler

Varieties of Black Walnuts rank in value in proportion to the ease with which the nut is cracked and the percentage of whole half-kernels that can be extracted. Under that rating the Stabler Grafted Black Walnut stands among the finest known up to the present time. The Stabler originated in Howard County, Md., and specimens of the nuts were sent to the leading nut specialists of the United States, some of whom pronounced it to be the **best cracking Black Walnut yet discovered**, yielding 50 to 70 per cent. whole halves, and averaging 40 to 45 per cent. kernel. The symmetrical shape of grafted trees of this variety and its beautiful willowy foliage give it a striking appearance in fields, yards, or along driveways.

Plant largely of the Stabler; it will bring returns in pleasure and profit out of all proportion to the original investment. We offer grafted trees of the Stabler at these prices:

2-3 ft., \$2.00 each; \$20.00 per doz.

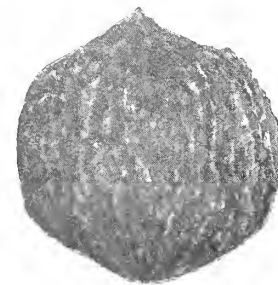

3-4 ft., \$3.00 each; \$30.00 per doz.

A Five or Six-Year-Old Black Walnut Tree. What Equals a Pound of Beefsteak in Nutrient You Will See in the Hat

a Season—\$2,080.00

Thomson

An Orchard Such as This on Your Farm or Estate Will Increase the Value Thousands of Dollars

ENGLISH WALNUT TREES

When you plant another tree, why not plant a northern grown English Walnut? Then in addition to shade and leaves, you may have an annual supply of the most delicious, nutritious and healthful food ever known. The eminent authority, Dr. Kellogg, claims an acre (40 trees) of English Walnuts will produce in a single year food value equal to that of 60,000 eggs.

Our northern grown English Walnut trees have been bred for health, hardiness and vigor in northern climates. They are hardy wherever Peaches grow and are as easily cared for. Of over 25,000 English Walnut trees standing outside during the severe winter of 1918, none were injured.

FAIRPORT AND THOMSON bear young, many trees here at Rochester bearing the fourth year. They surpass all other strains we have tested in adaptability and will do well in rocky soils, such as is found in pasture lands. They are grateful, however, to kind treatment, when planted in fairly rich soil.

DON'T PUT OFF PLANTING AT LEAST A FEW ENGLISH WALNUT TREES. Nothing will increase the value of your property more. Nothing will give you more satisfaction and in a few short years, trees planted now will be yielding Walnut for your own use.

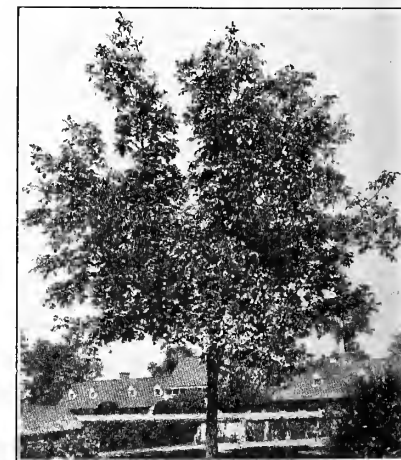

FAIRPORT—Originated in Rochester. Nut round, full meated, fine quality, thin shell. We believe this variety will give complete satisfaction with no losses if given intelligent care.

THOMSON—An excellent commercial nut for severe climates. A real paper shell, sweet and delicious, selling at wholesale from 4 to 6 cents a pound more in Rochester markets than do the California Walnuts.

2-3 ft., \$1.00 each; \$10.00 per doz.; \$ 60.00 per 100

3-4 ft., 1.50 each; 15.00 per doz.; 70.00 per 100

Special 5-6 ft., 3.00 each; 30.00 per doz.; 200.00 per 100

A Beautiful English Walnut Tree in Washington Garden, Mt. Vernon

FILBERTS FOR ZERO CLIMATES

This is probably the least appreciated of all nut trees in the East, notwithstanding its great commercial value in Europe and in our own Northwest. However, an increasing demand for the rich-flavored nuts, together with a gradually acquired understanding of the tree's cultural needs, is rapidly bringing the Filbert to the fore on the estimation of planters.

Trees grown at our Nurseries are withstanding temperatures of 15 degrees below zero without winterkilling, which should be sufficient warranty of their hardiness throughout the eastern and northeastern sections to call for extensive plantings. Moderately rich, well-drained soil is required, and pruning is essential if grown in tree form, although abundant crops of nuts are borne if permitted to grow naturally—in the form of a many-stemmed bush. The nuts should not be gathered until ripe, which condition is indicated by a browning of the husk.

The Filbert has proved an excellent filler for walnut orchards, coming into bearing early and remaining so low as not to interfere with the walnut trees. Should there come a time when the walnuts need all the space, the Filberts are easily removed.

PURPLE-LEAVED. One of the best of the American varieties; exceedingly ornamental, and bearing large, thin-shelled nuts of delicious quality. The leaves and husk are of a deep purple color, which is retained until frost. 2-3 ft., 75c each; \$6.00 per doz.; \$40.00 per 100. 3-4 ft., \$1.00 each; \$9.00 per doz.; \$50.00 per 100.

HAZLENUT (American Filbert). Another of the American varieties that ranks high as an ornamental and bears large quantities of sweet-flavored nuts. Should be more widely planted for both reasons. 2-3 ft., 50c each; \$5.00 per doz.; \$35.00 per 100. 3-4 ft., 75c each; \$7.50 per doz.; \$50.00 per 100.

KENTISH COB (English Filbert). Layered. Tree is productive of large oblong nuts; kernel plump and of rich flavor; excellent keeper. Husk smooth, longer than nut, but slightly cut in margins. 2-3 ft., 75c each; \$7.50 per doz.; \$40.00 per 100. 3-4 ft., \$1.00 each; \$10.00 per doz.; \$50.00 per 100.

COSFORD (Paper-Shell). We offer layered plants of this highly prized European variety that has won favor wherever grown for its thin-shelled, oblong nut containing a plump kernel of the richest flavor. Trees are very productive. Strong plants at the following prices: 2-3 ft., \$1.00 each; \$9.00 per doz.; \$60.00 per 100. 3-4 ft., \$1.50 each; \$15.00 per doz. 5-6 ft., \$2.00 each; \$20.00 per doz.

Europe has known and appreciated the Filbert for a long time, and it is rapidly coming into high favor with American planters owing to an ever-increasing demand on the markets for the plump, thin-shelled, delicious nuts that have an unusually rich flavor.

Appetizing Asparagus from Your Own Garden!

ASPARAGUS THE FIRST SEASON

Two Years Saved by Planting Four-Year-Transplanted Roots

When we talk about tender Asparagus on your table this coming June, fresh from your own garden, we know that your mouth not only waters, but that you look incredulous. Too good to be true, you say! And yet, it can be easily done if you plant some extra large Asparagus roots, such as we have worked over and transplanted for the last three years purposely ready to get immediate results.

We offer for Spring delivery, extra fine, four-year-transplanted roots,
\$1.00 per doz.; \$3.50 per 50; \$7.00 per 100

N. B.—Order early before our supply is exhausted.

Dwarf Mountain or Mugho Pine

Its beauty indescribable; the color, richness and thickness of its foliage unequalled; its hardiness and vigor unsurpassed. Such is the terse description of the Dwarf Mountain or Mugho Pine.

This rare evergreen was originally discovered in the Swiss Alps, high up in the mountains, where little other vegetation grows. It has become in a short time, the most popular of the dwarf Evergreens in this country, and rightly so.

It does not have a single or main trunk, but is composed of many stems which grow outward and upward, making the spread of the tree oftentimes twice its height. The foliage is a vivid dark green, which it holds throughout the year. The new growth appearing in the spring closely resembles tiny candle-sticks, covering the entire tree. This can be seen from the illustration.

It is a beautiful variety to plant in groups with other Evergreens; close to foundation walls or near porches, under windows where tall growing varieties cannot be planted. A Pair of Mugho Pines at the entrance to a yard or along a driveway gives a most delightful effect.

We have at the present time one of the largest stocks of Evergreens in the country. Each one grown for a specimen, and several times transplanted. Each shipped with the roots firmly encased in a ball of earth, to insure safety in transplanting.

Specimens 18 to 24-inch spread, \$5.00 each

Specimens 24 to 30-inch spread, 7.50 each

A Rich Solitaire for Any Setting—the Mugho Pine

Irish Juniper

By its very erect and columnar growth is an ideal Evergreen for formal planting. It requires but little space; never spreading over 1-1½ feet at the base. The foliage is quite different from any other Evergreen, the branches being covered with short pointed needles of the most delicate blue green in color. Its growth is dense and compact and grows from six to eight feet in height.

A tree of this character makes a decided contrast in most planting, and is used extensively in all artistic landscape work.

Specimens, with ball of earth, 2-3 ft.....\$1.50 each

Extra fine specimens, transplanted, with ball of earth, 3-4 ft... 4.00 each

A Suggestion

Owing to the scarcity of Boxwood and Bay Trees, individual specimens of hardy Evergreens are in great demand for outside and inside decorations, both summer and winter, for hotels, clubs, restaurants, apartments, residences, etc. The additional advantage of the hardy Evergreens over Boxwood and Bay Trees is their ability to withstand continued freezing without injury. Boxes can be made up with various arrangements of Evergreens.

Write us today and let us select a nice pair of Evergreens for tubbing, or will make you up an individual assortment for a box.

For Formal Effect—The Irish Juniper

A Suggestion!

Trees

TREES—by Joyce Kilmer who gave his life in France

I think that I shall never see A poem lovely as a tree.	A tree may in summer wear A nest of robins in her hair ;
A tree whose hungry mouth is prest	Upon whose bosom snow has lain ;
Against the earth's sweet flowing breast.	Who intimately lives with rain.
A tree that looks at God all day And lifts her leafy arms to pray ;	Poems are made by fools like me, But only God can make a tree.

Few Trees give in Autumn the Rich Effect of the
Mt. Ash with its Branches Ladened with
Beautiful Scarlet Fruit

There are few places that will not be improved in appearance by the addition of some deciduous trees, and a wisely planned and planted home grounds takes on financial value much in excess of the amount expended.

Plant more trees around you. They will give shade and beauty, provide nesting places for birds, in a few years each will have an inestimable value to your family and self.

We offer the following, each grown for a specimen, with good root systems, symmetrically branched, which will give you permanence and dignity in your planting and **immediate results.**

Memorial Trees

What more fitting memorial to our hero dead than a living tree growing each year to commemorate by its increasing strength and beauty the deeds of those who made the supreme sacrifice.

Every city and town will do honor to its sons who died, and to the homes bereft. No monument, no tablet, no memorial of any sort is so appropriate as a living tree for each soldier and sailor who died that liberty, justice and peace might prevail.

Deep rooted in the soil of their homes, its branches reaching aloft to the skies, its leaves sheltering the nests of happy birds—a tree is most symbolical of the life and deeds of the strong, courageous, clean-souled men whose memory will live forever in the hearts of the folks at home.

We are tree specialists and landscape architects of over fifty years experience. We will be glad to place our services at the disposal of any individual or community interested in nut, shade, fruit trees or evergreens.

The Cut Leaf Weeping Birch, Striking
and Graceful

THREE GRAND NEW SHRUBS

HYDRANGEA ARBORESCENS STERILIS, POPULARLY CALLED THE SNOWBALL-HYDRANGEA

Producing "Hills of Snow" from June until Fall

This new shrub is fast taking the place in public favor so long held by Hydrangea Paniculata Grandiflora. The flowers are purer white than those of the Hydrangea Paniculata Grandiflora, are quite as large and are borne in as great or greater profusion, remaining on the bush long after the foliage has disappeared and well into the winter.

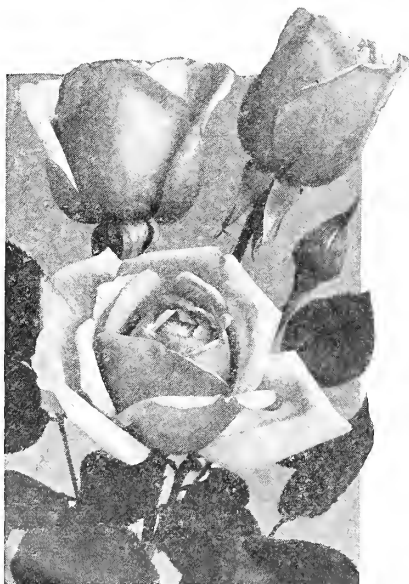

It has all the good qualities of the Hydrangea Paniculata Grandiflora and others peculiarly its own. While quite as bold and striking in its general characteristics it is coupled with a grace and elegance not found in the old favorite. Its foliage is much finer than that of the well-known Hydrangea Paniculata Grandiflora. Every shoot terminates in a showy bloom cluster. It produces from July until fall a bewildering profusion of flower heads, resembling giant snowballs—and much handsomer than those of other Hydrangeas.

50c each; \$5.00 per doz.

PHILADELPHUS, (Syringa), Boule d Argent. The only double Syringa. Leaves bright green, downy underneath, one to two inches long. Flowers white in short racemes, exquisitely fragrant, literally covering the branches. It attracts more attention in our nursery when in bloom than any other shrub.

Strong, vigorous bushes, with many branches,

\$1.00 each; \$10.00 per doz.

Panama

The Snowball-Hydrangea

LONICERA, RUPRECHTIANA, (Manchurian Honeysuckle). A large shrub, eight to ten feet tall, with broadly lanceolate dark green leaves which are whitened underneath with fine down. Native of Manchuria. Flowers, pure white, changing to yellow, opening in late spring. Berries red or yellow. Very showy.

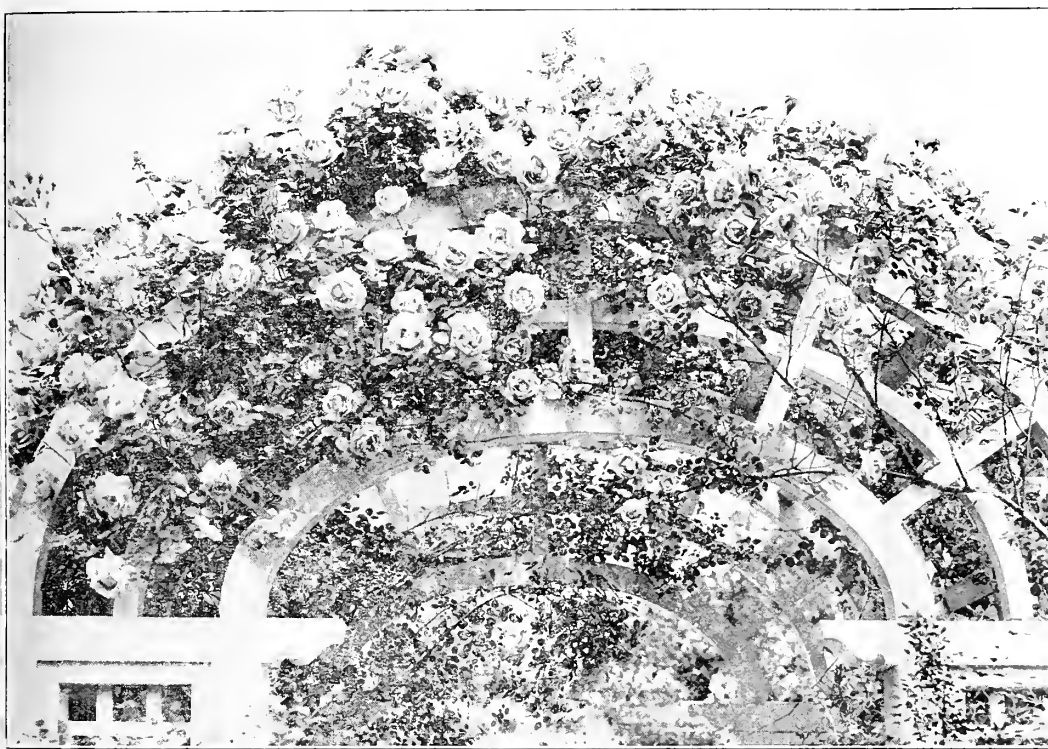

50c each; \$5.00 per doz.

PANAMA—A New Rose of surpassing beauty, sure to give universal satisfaction. A seedling from the popular Frau Karl Druschki. It is even more vigorous and free flowering than its parent which is saying a good deal. Flowers are large, perfect in form, and are produced freely. The vigorous branching growth terminates in one or more large flowers of a very delicate pink. It was awarded the American Rose Society's Silver Medal at the Hartford Test Garden. Absolutely hardy everywhere.

Strong two-year-old, field-grown blooming plants

\$1.00 each; \$10.00 per doz.

The Loveliness of the American Beauty is Indescribable

Climbing American Beauty

In size and loveliness of flower; in richness of its rosy crimson color; in hardiness and vigor, in fragrance, the Climbing American Beauty holds its own against all comers. It is in truth an "American beauty."

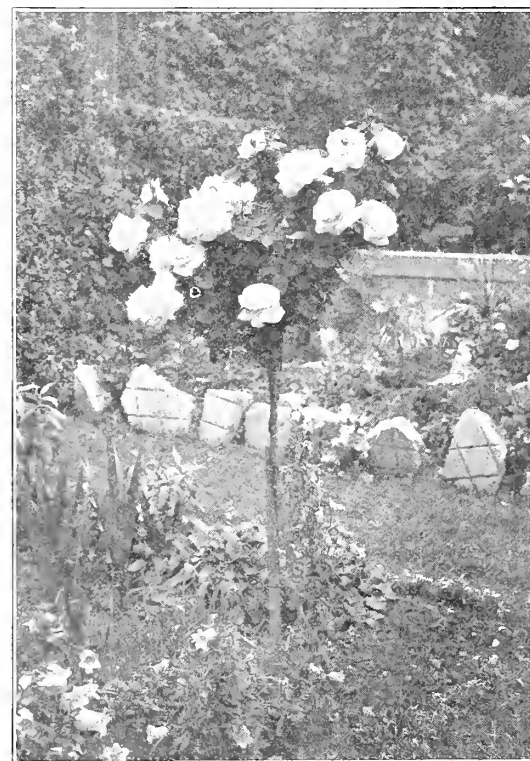

Strong, 2-year field-grown plants that have bloomed in the nursery row,

\$1.00 each; \$9.00 per doz.

National Emblem

HYBRID TEA ROSE (NEW)

In color it is a beautiful dark crimson, overlaid velvety crimson, shading to vermilion towards the edges. Buds are very long and pointed and the flowers full, and are profusely produced

A Solitaire to Set Among Your Garden Gems!

throughout the season. The foliage is very glossy and absolutely mildew proof. It is delightfully sweet-scented. (See illustration on next page).

\$1.50 each; \$15.00 per doz.

Tree Roses

The choicest of the Hybrid Perpetuals have been grown by us in Tree Form, 4-5 feet in height, for such of our customers who desire the formal appearance of the Tree Rose.

They have been grafted on *Rosa rugosa* or *Rosa cinnamomea* stock, insuring their hardiness. Covered with their lovely double flowers, they are a beautiful sight and no formal or old-fashioned garden is complete without them. In color, red, pink, white and yellow.

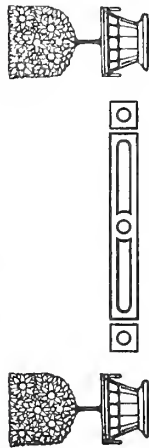

\$3.00 each; \$30.00 per doz.

HOW LATE CAN YOU PLANT?

This is the question that comes up every spring, during the month of April, after the first few warm days have come and made the buds swell. The important rule to remember in transplanting trees, shrubs and plants of all sorts is that the stock should be dormant. Dormant stock can be planted with safety throughout the United States and Canada even late in the spring, although, of course, the later one plants the shorter the growing season, but as long as the results are successful each planter should remember that he is gaining a year's growth over waiting until fall. We keep our stock dormant by special methods, until late in May, and as long as we accept orders, our customers may rely upon our making good any losses that arise in error of judgment on this point. Last year our stock was dormant and we shipped until the 10th of June.

NATIONAL EMBLEM TEA ROSE—(For Description, Page 11)

Free Offer with Every Order

With every order received from this booklet during the months of April and May, we will include with our compliments, one strong plant of the glorious new scarlet Peony

President Roosevelt

considered by all who have seen it one of the most beautiful Poenies in cultivation.

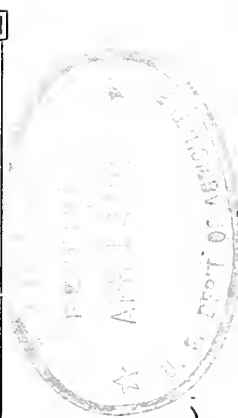

The planting of this beautiful variety is a fitting memorial to our great President, for whom it was named in 1917.
